

- Assist in developing suitable research and monitoring initiatives for marsh fritillary and the population restoration project.
- Work with line manager, Trustees and project partners to fundraise for the continuation of the project and for further species recovery initiatives in Wales.
- Contribute to other work of the organisation when required.

Partnership Working

- Engage with and regularly update partners, supporters and funders involved in the marsh fritillary population restoration project.
- Work with key stakeholders within the partnership to ensure habitat management and creation initiatives are being developed in the wider landscape.
- Help encourage and support academic institutes, students and volunteers to undertake suitable research projects for marsh fritillary and the population restoration project.
- Help identify the next steps for marsh fritillary conservation in the Upper Ely landscape and map out how best they can be achieved by the partnership.

Communications

- Help raise the profile of the project and its outcomes through social media posts, written articles, press releases and other suitable media.
- Work with project manager and partners to promote marsh fritillary conservation locally throughout the different communities in the the Upper Ely landscape.
- Help INCC raise awareness of the importance of population restoration projects throughout the nature conservation sector.
- Undertake educational talks to promote the project and marsh fritillary conservation in Wales.
- Where possible, undertake informal community training and guided walks of the receptor site to promote the project and marsh fritillary conservation.
